Dear Mr Sikora!

We had a pleasure to work with Tomasz Treider at Kazakhstan oil and gas trading and transportation conference in Almaty on 14-15 September. The conference was supported by the Ministry of Energy of the Republic of Kazakhstan. Mr Treider was one of the key-note speakers at the conference on the first day. His presentation of gas hub markets was very informative and dynamic and attracted a number of positive comments from the delegates. It was also clear that Mr Treider is a very skilled orator and possesses vast experience in the oil and gas industry right across the barrel. It was also extremely helpful to us, that both you and Mr Treider were able to respond to our invitation at the very short notice, as we had an unexpected speaker drop-out.

Our delegates, among them producers, refiners, traders, government officials and analysts have found Mr Treider's input extremely informative and helpful, and his industry expertise insightful. We would not hesitate to invite Mr Treider again to our conferences and workshops as both speaker and Session Chair.

George Pirchalaishvili
Executive Director
